Subject: Proposal for software development, implementation and support

Dear Mr. Hossain,

Tech Team IT Solution Ltd. is pleased to submit this proposal for a Dealer & Distribution Management System for Madina Natural Health Care, based on the revised feature requirements discussed with you.

The proposed solution connects the public website, dealer and sub-dealer network, field sales representatives (SR), product videos, orders, stock, dues, commissions, ranks, salary and withdrawals. Authorised staff will control daily operations, while dealers and sub-dealers access their permitted orders, earnings and network information.

The following pages describe the included modules, service arrangements and commercial terms. Fee, delivery and support fields are left blank for completion by the parties. Requested changes may be recorded on page 15 before signing. Product-specific discounts and commission rates are configurable.

Yours sincerely,
For Tech Team IT Solution Ltd.

Proposal guide

Section	Page
Public website / dealer portal / sub-dealer portal	03 / 04 / 05
SR panel / administration / finance	06 / 07 / 08
Product pricing / distribution / rank policy	09 / 10 / 11
Workflow and delivery acceptance	12
Implementation / commercial offer	13 / 14
Service schedule and client amendments	15
Ownership, confidentiality and agreement terms	16
Acceptance, signatures and advance receipt	17

02 / INCLUDED MODULES

Public website & dealer discovery

A responsive public website for presenting the company, showcasing products and helping visitors find approved dealers.

Ref.	Module / feature	Included scope
P01	Home & navigation	Home page with banners, featured products and company highlights. Navigation for Home, Products, About Us, Contact, separate Customer / User Login, Dealer / Sub-Dealer Login and SR Login.
P02	Company information	Editable company introduction, history, mission, vision, objectives and contact information.
P03	Smart product showcase	Product categories, product listing and detail pages with images, descriptions, prices and visible In Stock / Out of Stock status.
P04	Product marketing	Admin-managed promotional banners, featured products, offers, special discounts and campaign sections.
P05	Dealer directory	Search and filter approved, registered dealers by division and district. Display approved dealer point and area information.
P06	Nearest dealer search	Use the visitor's browser location permission and saved dealer coordinates to show nearby dealer points. Division / district search remains available when location is unavailable.
P07	Contact & enquiries	Contact form, company contact details and a location map. Enquiries are made available to authorised staff.
P08	Content management	Authorised editors can update website text, banners, notices, images and marketing content through the administration panel.

Ref.	Module / feature	Included scope
P09	Product video marketing	Admin-managed YouTube / Vimeo embeds or direct video links on product detail pages and home-page promotional sections.

Presentation and supplied content

The website will adapt to desktop and mobile screens. The client will supply the approved company logo, product details, prices, images, video links, contact details and marketing content. Public dealer contact details will follow the client's approved visibility settings.

> A map service requiring a paid API, SMS service or other third-party subscription will be recorded in the commercial schedule before activation.

03 / INCLUDED MODULES

Dealer & customer portal

A personal dashboard for approved users and dealers, with account information and records limited to their permitted access.

Ref.	Module / feature	Included scope
D01	Profile & account	Display the approved profile. Users cannot edit their profile information; authorised administration staff can make corrections. Account login and password recovery are provided.
D02	Product requests	Select products and quantities, provide a payment transaction ID and submit an order / purchase request for administrative verification.
D03	Order tracking	View pending requests and subsequent order status. For unavailable stock, show the delivery estimate entered by administration. Once dispatched, show the courier name, tracking reference and supplied contact / slip details.
D04	Stock & notifications	Show available and out-of-stock products. Display dashboard notifications when new products are added to stock, together with relevant order updates.
D05	Dues & pending delivery	View unpaid purchase balances, later payments and adjustments. Separately view products or quantities still awaiting supply. Both panels display the same underlying history.
D06	Wallet & withdrawals	View available earnings and submit a withdrawal request. Default minimum withdrawal: BDT 200, configurable by authorised administration. Display request and payment status.
D07	Transaction history	View purchase, income, due adjustment, withdrawal and pending request records with dates, amounts and references.
D08	Referral network	View a referral tree, downline counts and permitted purchase / transaction details. Provide a separate direct-referral list and a date-based transaction timeline.
D09	Ranks & rewards	View achieved rank, qualification progress, incentives, bonuses and recorded rank increments under the configured business rules.

Referral access is restricted to the dealer's permitted network. Sensitive payment credentials and unrelated users' private records are not displayed in network reports.

04 / INCLUDED MODULES

Sub-dealer pricing, portal & salary

A separate sub-dealer account type with its own purchase pricing and monthly salary rules, managed through authorised administration.

Ref.	Module / feature	Included scope
S01	Accounts & access	Create, approve and manage sub-dealer accounts. Assign permitted access and any required sponsoring dealer relationship. Keep profile changes under administrative control.
S02	Purchases & fulfilment	Show sub-dealer prices and support product requests with payment references, stock status, back-order estimates, courier updates and shared due / payment history.
S03	Salary & earnings	Track monthly purchase totals and salary at a flat 3% of the full monthly purchase amount. Maintain approval, payment and transaction history; apply approved withdrawal and reward eligibility settings.
S04	Controls & reporting	Configure sub-dealer discount, the flat salary rate, the 3% tour allocation and applicable reward allocations separately. Report purchases, dues, salary, earnings and payments with date filters and Excel / PDF export.

Sub-dealer purchase pricing - default example

Product MRP	Purchase discount	Sub-dealer price	Margin at MRP resale
BDT 200	40% = BDT 80	BDT 120	BDT 80 before expenses

This example uses a 40% discount. Each product can have a separate sub-dealer discount from 20% to 50%. The discount is reflected in the purchase price. Resale margin is realised through the sale of goods; separately earned wallet income follows the approved reward rules.

Flat monthly salary and tour allocation

Benefit	Rate and calculation	Example
Sub-dealer salary	Flat 3% of the full monthly purchase amount	BDT 50,000 × 3% = BDT 1,500
Sub-dealer tour allocation	3% of the sub-dealer purchase value	BDT 120 × 3% = BDT 3.60

The flat 3% salary replaces the previous 1%, 2%, 3% and 4% monthly purchase tiers. Salary is accrued within the distribution schedule and paid through the monthly salary process, with each amount recorded once.

The 3% tour allocation is tracked separately from salary. Its use and release follow the approved tour policy. Authorised administration can change rates with an effective date.

05 / INCLUDED MODULES

Sales Representative (SR) panel

A controlled workspace for field sales staff, with accounts created by authorised administration and access limited to assigned duties and geographic areas.

Ref.	Module / feature	Included scope
SR01	Admin-created accounts	Super Admin or explicitly authorised staff create SR accounts, assign the area / zone and activate, suspend or restore access. There is no public SR registration.
SR02	Individual permissions	Set menu and action permissions for each SR, including view, request, create and edit rights. Restrict records to the assigned area and permitted dealers.
SR03	Field sales operations	Where permission is granted, submit new dealer / sub-dealer applications, view assigned-area dealers, place product requests on a dealer's behalf, and view due balances and collection reports. Approval remains with authorised staff.
SR04	Targets & earnings	Display area sales statistics, monthly targets versus achievement, and the SR's own salary / commission ledger and payment status.

Operational accountability

Orders submitted by an SR retain both the requesting SR and the dealer account reference. Dealer pricing, payment checks, stock control and order approval follow the same company workflow.

Access and handover checks

Demonstrate that an SR cannot self-register, see another area without permission, approve an order without authority, or access unrelated staff earnings. Demonstrate that withdrawing a permission also prevents the corresponding action.

> SR salaries, targets and commission eligibility are configured under the approved company policy. Cash collection or payment approval access requires an explicit permission and recorded responsibility.

06 / INCLUDED MODULES

Administration, products & operations

Ref.	Module / feature	Included scope
A01	Staff roles & permissions	Create roles such as Super Admin, Finance, Inventory, Editor, Support / Viewer and SR. Configure menu access and permitted actions, including view, create, edit and approval permissions.
A02	User control	Create and manage users; suspend / restore access, reset passwords and correct profile information. Maintain an action history for administrative changes.
A03	Dealer applications	Review dealer and sub-dealer requests, verify details and approve or reject registration. Manage account type, status and associated account information.
A04	Area codes & locations	Assign dealer codes, area codes and geographic zones. Maintain division, district, upazila and union information and dealer point coordinates.
A05	Product registry	Manage categories, images, video links, descriptions, cost / COGS, MRP and product status. Set dealer and sub-dealer discounts separately for each product, from 20% to 50%.
A06	Inventory control	Record stock received, stock issued and authorised stock adjustments. Set low-stock thresholds and show low-stock / out-of-stock alerts and current availability.
A07	Order administration	Verify submitted payment references, approve requests and process orders. Set back-order delivery estimates and record partial / completed dispatch, courier details and tracking information.
A08	Due management	Record product sales on credit, payments received and authorised balance adjustments. Track undelivered quantities separately so that financial dues and pending supply remain clear.
A09	Editable business settings	Maintain website content, banners, videos, notices, permitted menu settings and supported business configuration from the administration panel.

> “Editable administration” covers the content, permissions and business settings listed in this proposal. New software modules, screen structures or workflows are handled through the change process on page 16.

07 / INCLUDED MODULES

Commissions, finance & reporting

Ref.	Module / feature	Included scope
F01	Commission settings	Configure default dealer 40% and sub-dealer 50% distribution schedules, category percentages and approved dealer / user exceptions. Maintain recipients, eligibility conditions and an effective date for rule changes.
F02	Referral management	Generate dealer referral codes, manage approved referral relationships and view network trees. Support the dealer-to-dealer first- and second-generation reward rules.
F03	Reward categories	Configure referral reward, area commission, own-dealer commission, dealer salary allocation, dealer-to-dealer reward, rank royalty, rank incentive, marketing allocation, car / motorcycle incentive, additional rank reward, sub-dealer salary and tour allocation.
F04	Territory & rank rules	Support management, division, district, upazila and union allocations. Manage Marketing Officer (MO), Area Manager (AM), Sales Manager (SM) and Marketing Executive (ME) qualifications, one-time incentives and recurring royalty eligibility.
F05	Salary & incentives	Maintain monthly staff, SR, dealer and sub-dealer salary sheets and approved incentives, including the flat 3% sub-dealer monthly salary, with eligibility, approval and payment status.
F06	Withdrawal & payments	Review withdrawal requests, approve or reject with a reason, record payment references and reconcile paid status. Manage published bKash, Nagad, Rocket and bank collection / payout account details.
F07	Transactions & audit	Maintain a traceable history of purchases, earnings, withdrawals, dues and financial adjustments with actor, date and reference details. Preserve past transaction records when rules change.
F08	Reports & exports	Product and category sales, commissions, rank / incentive, salary, dues, withdrawals and transaction reports. Daily, weekly, monthly and custom date-range filters with Excel / PDF export.

The current dealer and sub-dealer distribution schedule appears on page 10. Rates, qualification targets, beneficiary rules and payout periods are configurable by authorised administration.

> Payment account setup and manual transaction verification are included. An automated payment API or courier API is included only if its provider and integration scope are entered in the commercial schedule.

08 / BUSINESS RULES

Product pricing & configurable commissions

Each product has an MRP, cost / COGS and separate dealer and sub-dealer discount settings. Authorised administration can set each discount between 20% and 50%.

Rule	Included behaviour
Purchase price	MRP × (1 - the applicable account-type discount). Show the applicable price before the request is submitted.
Default examples	At MRP BDT 200: a dealer at 50% discount pays BDT 100; a sub-dealer at 40% discount pays BDT 120. These are examples, not fixed discounts for every product.
Distribution basis	Commission percentages apply to the qualifying purchase value paid to the company. The default category schedules are shown on page 10.
Company retention	The default worked examples reserve 30% of MRP for the company. Preview retained funds, allocations and any residual under the approved product policy.
Configurable rules	Authorised staff may change category rates, approved dealer / user exceptions, recipients and eligibility with an effective date.
Historical records	Store the applied price, discount and rule version for each approved order. Later changes apply to subsequent eligible approvals; past transactions and audit records remain intact.
Balanced allocations	Validate the company share and total allocations against the available purchase amount. Prevent an over-allocated configuration from being activated; show any unallocated balance for approved treatment.

Salary, tour and adjustments

The default sub-dealer salary is a flat 3% of the full qualifying monthly purchase amount; tour allocation is a separate 3%. Monthly settlement pays the recorded salary accrual once. Returns, cancellations and authorised corrections are recorded as linked adjustments under the approved policy.

> The total distribution is a shared schedule across eligible recipients and funds. It is not a promise that a single purchaser receives every category. Discount, commission and salary rates can be revised prospectively by authorised administration.

09 / BUSINESS DISTRIBUTION

Dealer & sub-dealer commission distribution

This default example uses one product with MRP BDT 200 and dealer / sub-dealer discounts of 50% / 40%. Rates are configurable per the pricing policy on page 9. Distribution rates apply to the amount paid to the company: BDT 100 for a dealer or BDT 120 for a sub-dealer.

Pricing / available amount	Dealer	Sub-dealer
Purchase discount from MRP	50% = BDT 100	40% = BDT 80
Purchase value / distribution base	BDT 100	BDT 120
Company share: 30% of MRP	BDT 60	BDT 60
Available for distribution	BDT 40	BDT 60

Distribution category	Dealer %	Dealer BDT	Sub-dealer %	Sub-dealer BDT
Referral commission	10%	10.00	10%	12.00
Area dealer commission	10%	10.00	10%	12.00
Own-dealer commission	5%	5.00	5%	6.00
Dealer salary allocation	2%	2.00	2%	2.40
Rank royalty	4%	4.00	4%	4.80
Rank incentive	2%	2.00	2%	2.40
Dealer-to-dealer (D2D)	3%	3.00	3%	3.60
Marketing allocation	2%	2.00	2%	2.40
Car / motorcycle incentive	2%	2.00	2%	2.40
Additional rank reward	-	-	4%	4.80
Sub-dealer salary	-	-	3%	3.60
Sub-dealer tour allocation	-	-	3%	3.60
TOTAL DISTRIBUTION	40%	40.00	50%	60.00

Area commission: management, division, district, upazila and union each receive a 2% allocation. D2D: first generation 2% plus second generation 1%.

The sub-dealer schedule retains the separate 4% rank reward and 4% rank royalty shown in the supplied flow. The 2% dealer salary allocation and 3% sub-dealer salary are separate categories. Beneficiaries follow the approved eligibility rules.

> Dealer: BDT 100 = company BDT 60 + distribution BDT 40. Sub-dealer: BDT 120 = company BDT 60 + distribution BDT 60. The salary amounts above are accruals toward monthly salary, not an additional second salary payment.

10 / REWARD POLICY

Ranks, incentives & recognition

The following starting configuration is taken from the latest supplied business policy. Rank qualification rules, sales periods, eligible team relationships and recipients are configurable by authorised administration.

Rank	Starting qualification	One-time incentive	Royalty pool rate
Marketing Officer (MO)	Own sales of BDT 25,000	BDT 5,000	1%
Area Manager (AM)	10 MO in direct / team network	BDT 50,000	1%
Sales Manager (SM)	10 AM in the team	BDT 250,000	1%
Marketing Executive (ME)	10 SM in the team	BDT 300,000	1%

Royalty is linked to qualifying running-month sales. The four 1% rank allocations together correspond to the default 4% rank royalty fund. The approved policy must define the sales base, how eligible members share each allocation and the monthly settlement process.

Motorcycle reward configuration

Item	Starting policy
Team sales target	BDT 5,000,000 (fifty lakh)
Reward value	BDT 300,000 (three lakh)
Maximum counted per referral line	BDT 800,000 (eight lakh)
Qualification control	Track each line separately, apply the line cap, show progress and record reward approval and fulfilment.

Eligibility and payment controls

Record rank achievement, qualification evidence, one-time award history and recurring royalty approval. Sales returns and approved reversals must be reflected in qualification under the published policy. Maintain separate ledgers for royalty, rank incentive, additional rank reward and car / motorcycle funds.

> Targets and reward values are business-policy settings, not software delivery fees or guaranteed personal earnings. The company confirms eligibility and payout conditions before activating a programme.

11 / WORKFLOW & ACCEPTANCE

From product request to payment record

Step	Business workflow
01 Request	Dealer / sub-dealer selects products at the applicable price, enters the payment transaction ID and submits a request; an authorised SR may submit on the dealer's behalf. Both panels show the pending request.
02 Verify	Authorised staff verify payment details, review available stock and approve, hold or reject the request with a recorded status.
03 Fulfil	Staff record stock issue and dispatch details. For unavailable or partially supplied items, the remaining quantity and expected supply date stay visible.
04 Reconcile	Payments, credit dues and later adjustments update the shared order history and financial balance.
05 Calculate	Eligible earnings, referral rewards, rank progress and salary / incentive records follow the configured rules and approved recognition event.
06 Withdraw	Dealer requests a withdrawal; finance reviews it and records the payment result. The wallet, transaction history and reports reflect the same outcome.

Delivery acceptance checklist

Area	Demonstration at handover
Public website	Products, promotional videos, company content, dealer filters and permitted location search operate on desktop and mobile.
Access & profile	Staff and individual SR permissions and area restrictions are enforced, dealer profile editing is locked, and users see only permitted records.
Orders & stock	A sample order proceeds through verification, stock handling, pending supply and courier updates.
Dues & payments	Both panels show matching due and payment records; a withdrawal below the configured minimum is prevented.
Rewards & reports	Verify 20%-50% per-product discounts, custom commission rates, historical rate preservation, rank rules, flat 3% salary and 3% tour allocation using agreed examples. Report totals match the underlying records.
Handover	Authorised access, agreed training and operating instructions are delivered; issues are recorded and resolved against the agreed scope.

The parties will review the agreed scope at delivery and record any remaining corrections. A request for an additional feature follows the change process on page 16.

12 / DELIVERY & SERVICE TERMS

Implementation, support & responsibilities

Stage	Deliverable / activity
1. Confirm	Finalise the feature list, business rules, supplied content and completed commercial schedule.
2. Configure & develop	Prepare the website, videos, dealer / sub-dealer portals, SR panel, permissions, inventory, order handling and configurable financial rules described in this proposal.
3. Review & test	Provide a demo / staging link for progress review. Present the system for client review, test agreed business examples and address corrections within the signed scope.
4. Deliver & train	Deploy to the agreed environment, demonstrate operational workflows and hand over agreed access and instructions.

Agreed delivery period (working days / weeks)

Target delivery date

Included support period after delivery

Training arrangement / sessions

Working arrangements

The delivery period starts after scope confirmation, receipt of the one-third advance and availability of the required content, business rules and access. Delays in client inputs or an approved scope change will be recorded with the revised schedule.

The client will nominate a contact for decisions and provide product data, opening stock / balances, dealer records, location details, product videos, approved reward rules and any required provider credentials. The supplier will configure, test and demonstrate the agreed workflows and deliver operating guidance.

Support and handover

Included support covers faults in the delivered, agreed functions during the period entered above. Support hours, contact channel, hosting, backups, repository / access handover details and any recurring charge must be completed in the schedule on page 15.

Feature modifications and additional services

The client may request additions, removals or improvements before approval. After approval, the supplier will state the effect on price and delivery time; both parties will confirm the change before work begins. Corrections needed to meet the signed scope are included.

Hardware, connectivity, native mobile apps, historical data migration, bulk data entry, paid third-party services and automated gateway / courier integrations require an explicit entry in the commercial schedule if required.

13 / COMMERCIAL OFFER

Cost summary & payment schedule

Currency: Bangladeshi Taka (BDT). Complete the blank commercial fields in ink before signing. Write “N/A” where a service does not apply.

Package	Coverage
Dealer & Distribution Management System	Public website and video marketing; dealer, sub-dealer and customer access; permission-controlled SR panel; per-product 20%-50% discounts and dynamic commissions; sub-dealer pricing, flat 3% salary and 3% tour allocation; staff roles; products, stock, orders and dues; referral, commission and ranks; withdrawals; reporting; implementation and agreed training.

Software development & implementation fee (BDT)

VAT / tax treatment and amount, if applicable

Agreed additions / deductions (BDT)

TOTAL AGREED PROJECT FEE (BDT)

Total agreed project fee in words

Payment stage	Share of total fee	When payable
Advance	1/3 of the total agreed project fee	With work order / approval, before work starts.
Delivery balance	2/3 of the total agreed project fee	At successful demonstration and delivery of the agreed system.

Advance amount: total fee ÷ 3 (BDT)

Delivery balance: total fee minus advance (BDT)

Use the exact one-third / two-thirds split. If rounding to the smallest currency unit is needed, adjust the delivery balance so both payments equal the total agreed fee.

Payment method / payee account

Offer validity / acceptance deadline

> The total agreed project fee covers the included package and any expressly agreed changes. Separate recurring service charges, third-party subscriptions and handover arrangements must be entered on page 15.

14 / SERVICE SCHEDULE & AMENDMENTS

Service arrangements & requested changes

Complete the service arrangements below. Write “N/A” for services that are not required. Any cost included in the project fee should be identified as “included”.

Optional maintenance: fee, frequency & start date

Support hours & contact channel

Hosting / domain / backup responsibilities and recurring costs

Repository / access handover details (ownership terms on page 16)

Agreed API providers, data migration or other additions (scope & cost)

Client feature amendments

Record requested additions, removals, modifications or improvements below. Approved amendments form part of this quotation when acknowledged by both parties. Attach a numbered page if more space is required.

Requested feature changes / improvements

Agreed fee effect (included / revised amount)

Agreed delivery / support effect

Approved attachment references / page count

Both parties should initial agreed handwritten amendments and reflect any change to the total project fee on page 14 before signing page 17.

15 / AGREEMENT TERMS

Ownership, confidentiality & changes

Source code and handover

After full payment of the agreed project fee, the customised system, database schema and related custom source code will be handed over to the client with ownership and full usage rights. Repository, deployment and credential transfer details are recorded on page 15. Third-party and open-source components remain subject to their respective licences.

Confidentiality and data security

Both parties will protect business strategy, cost information, dealer lists, commission rules, financial records, source code and security credentials during and after the engagement. Disclosure requires the other party's written consent, except where required by applicable law. The supplier may not sell or transfer the client's business data, dealer network or custom branding without written permission.

The supplier will provide appropriate access controls, secure credential handling and backup guidance. Hosting, backup frequency, retention, restoration responsibilities and support contacts will be recorded in the service schedule.

Changes, corrections and continuing support

Before signature, the client may add, remove or improve features using page 15. After signature, a new module, screen structure or workflow requires a written estimate and approval of its fee and time effect. Corrections required to meet the signed scope are included; after-delivery fault support follows the agreed support period. An optional monthly or annual maintenance agreement may be recorded separately.

External services and exclusions

Payment account setup and manual TrxID verification are included. Automated payment or courier API development must be expressly scheduled. Paid maps, SMS, gateway subscriptions, hosting and domain renewals are client costs unless marked included. Hardware, internet access, native Android / iOS apps, historical migration and bulk data entry require a written scope entry.

Termination and settlement

For a material breach, the affected party may give written notice allowing 15 working days to remedy it. If it remains unresolved, that party may terminate by written notice. The parties will reconcile payments against work completed and modules delivered, recording any balance, refund and handover due.

Applicable law and dispute resolution

The agreement is governed by the applicable laws of Bangladesh. The parties will first seek resolution through mutual discussion. If unresolved, they agree to refer the dispute to a mutually nominated arbitrator under the applicable arbitration law of Bangladesh.

Client registered / correspondence address

Supplier registered / correspondence address

16 / APPROVAL & AGREEMENT

Acceptance & signatures

By signing below, the parties accept this quotation, the completed commercial and delivery terms, and the amendments recorded on page 15 and in the listed attachments. Complete all essential blank terms before signing.

> Payment: one-third of the total agreed project fee in advance, with the remaining two-thirds payable at delivery of the agreed system.
